Summary

I am a JavaScript front-end developer focused on further self-development and learning new, relevant frameworks, languages, and applications. I have a solid knowledge of HTML5, CSS3, JavaScript, GitHub, Figma, VisualStudioCode, and Vite. I study React, and Node.js to create modern, convenient, useful, and fast websites. I have experience working in a team and managing a team, experience in solving problematic issues, communicative, and open to new achievements. I am confident that I will be able to occupy a worthy place in the team of IT professionals.

Projects
